POLYMERS PVT.LTD

LET'S GROW TOGETHER!

ABOUT US

Bai-Kakaji Polymers Pvt. Ltd. was formed in 2013. Bai-Kakaji Polymers Pvt. Ltd. is located at Latur, Maharashtra. We, one of the leading Alaska (water) closures, CSD 1881 Closures & PET Preform manufacturers. In 2013 we started with one preform manufacturing machine now with SACMI, HUSKY & ASB machines our per month production capacity HDPE alaska caps: 250 million PP caps for carbonated soft drinks: 38.5 million Pet preform used for packaged drinking water and other beverages : 1200 MT Closures are produced on World class SACMI compression mold machine & PET preforms are produced on World Class - Husky & ASB Nissei Injection Molding machines. This results in a smooth finish, flash free, tailless and uniform wall thickness preform with high clarity, dust free, superior quality and near zero rejection. The design is such that while blowing the preform you will get uniform material distribution resulting in superior sturdiness and improved transparency. SACMI machines provide best quality compressed closures which results in nearly zero rejection and leakage. The preforms & Closures are made under stringent quality control conditions. This gives our customers trouble free production with near zero rejections which saves valuable time as well as reduces their production costs. Our fully equipped laboratory ensures that all products meet or exceed international quality standards.

OUR PHILOSOPHY

We Believe that with every deal we do, we get a new partner for growth. We work with you because we believe in your growth story and hence we say Is Come Together

VISION

"Enhance the lives of the billions of people, helping to solve their drinking water problem & raising their living standards"

MISSION

"To deliver highest standards on quality & safety for our products, nurturing the environment & contributing to the development of the society"

PET PREFORM

HDPE CAPS FOR CARBONATED SOFT DRINK (SINGLE PIECE)

SPECIFICATION

Suitable for 1810 neck finish commonly used for Juice,Phynile bottol

Base material- HDPE

Number of Knurls 120

Weight 2.7 (+/-0.05) gms including liner per closure.

Note: Closure pictures are only for reference purpose. You may not get or develop any color as per requirement

BT CAP

SPECIFICATION

Bubble top caps for 20 ltr jar
Full cap which provide complete seal
Made from LDPE virgin material
Easy to unlock
Weight 4.45gm& 3.5gm approx

Note: Closure pictures are only for reference purpose. You may not get or develop any color as per requirement

JAR

SPECIFICATION

Complete 20 ltr water capacity
Weight 685gm & 710gm

Note: Closure pictures are only for reference purpose. You may not get or develop any color as per requirement
